MONEY, STOCKS AND BONDS.

Slight Increase in Activity Made at the Expense of Values.

NEW YORK, July 28.-Money on call was easy, ranging from 2 to 4 per cent., the last loan being made at 3, closing offered Prime mercantile paper 5@612 per cent.

Sterling exchange quiet and steady at \$4.85 for sixty-day bills and \$4.8834 for demand.

The total sales of stocks to-day were 163,-062 shares, including the following: Atchison, 18,410; Delaware, Lackawanna & Western, 14,720; Missouri Pacific, 3,880; Richmond & West Point, 3,659; St. Paul, 9,502; Union Pacific, 11,470.

The stock market on the whole displayed a little more activity than last week, but the "bears" seemed to have acquired courage to attack the list from the dullness long continued, and the lower prices in London, coupled with the disturbances in the Argentine Republic. Prices consequently are generally slightly lower than at the close of last week. London was a seller to a limited extent, owing to the fortnightly settlements, but London is not now either a buyer or seller of American stocks to any amount, and speculation for the present in American stocks there seems to be in the same condition that our market is here. The lower London figures and the slight pressure of foreign stocks for sale led to a trial of the market by the "bears," and that is all there is to to-day's stock market. As usual, Sugar Refineries attracted most attention, both for its activity and weakness. The only stocks of the regular list showing any animation or a tendency to follow were Atchison and Union Pacific, and in neither did the fluctuations amount to as much as 1 per cent. Lackawanna also came in for some of the pressure late in the day, and the theory was that it was no longer supported and must yield readily to pressure of short sales. Among all but professional oper-ators there is not the slightest disposition to trade either on one side or the other, and in the dullness, as usual, the short side is most inviting to the traders. The apathy displayed among even that class of oper-ators, however, is remarkable. The "bears" are working on the theory that before any material change can take place there must be a downward movement to invite buying, and hence are from time to time test-ing the market in a limited manner, but the success attending these tactics last week will not encourage any large ventures in that direction unless supported by some outside influence like that of to-day. The pressure upon the list was almost continuous to-day, and prices slowly yielded without material osses, except in the few stocks mentioned, and the market closed barely steady on a light rally, with prices generally slight fractions below those of Saturday. Sugar,

however, was down 218 per cent., Atchison 1 per cent., and Union Pacific 78. Railroad bonds showed considerable sympathy with the decline in stocks, but there was no marked loss. The tone of the dealings was generally heavy, with fluctuations as usual scarcely perceptible, while the dealings lacked feature of any kind. Mobile & Ohio new sixes, however, rose 2 per cent., to 115; but no other important changes occurred. The trading was light

Government bonds were dull and steady. State bonds were neglected. Closing quota-

TRADING AT CHICAGO. The Grain and Provisions Markets Excited

-Sharp Advances and Heavy Business. CHICAGO, July 28.-A large business was transacted in wheat, and the feeling was unsettled and nervous. More or less excitement existed, especially during the early part of the session. Prices were higher, but the full advance was not sustained. The opening was 112@2c higher than Saturday's closing figures, but the advance brought out free speculative offerings, and prices declined 1@114c, then fluctuated, and closed about 118@114c higher than Saturday. The advance was attributed to about the same influences which have affected the market of late. Advices from the Northwest note very hot weather and further damage to the crop. At points in northern Dakota the thermometer was 105° and 110°. There was an immense trade in corn, which was exceedingly wild and very irregular. price changes being sharp and frequent coverings within 11- @2c range. The feeling prevailing was much stronger, and a quick advance was scored early in the day, but a sharp break followed, the market ruling easier, but closed firm. The early strength was due to bad cropadvices. The buying in of short corn, when the failure of a local house was announced, also tended to boom the market. There was free realizing flat vellow was 6d dearer and round 3d on the advance, large quantities of long property coming out and prices receded 2c from outside figures. Oats were firm and during the first part of the session considerable excitement prevailed, due to the announcement of a prominent trader that he wished his trades closed out. This made operators wild to buy and first sales were at 58@15sc over Saturday's close. September and May were the most excited and showed the greatest irregularity, sales for September being at 1c apart at about the same moment. July and August, while not traded in very heavily, sympathized with the other deliveries and advanced 11cc for July and 2140 for August. Pork trading was fairly active. Prices advanced 50@75c early but settled back again 40@50c and closed steady. Lard trading was very active. Opening sales were made at .1212@ .15c advance. Later prices receded .05@ .071cc and closed comparatively steady. In short-rib sides an unusually heavy trade was reported. Opening sales were made at .10c advance, followed by further improvement of .0212c. Later prices settled back .0212@.05c. About the middle of the session prices rallied .0712@.10c. Toward the close prices receded .0212@.05c and closed steady. The leading futures ranged as fol-

The Foreign Grain Trade.

LONDON, July 28.-The Mark Lane Express in its weekly review of the British grain trade says: Improved weather has bettered the prospects of wheat although the expectations of a crop over the average are not good, the outlook being that it will be 5 per cent. less than the usual crop. Bar-ley, oats and beans have suffered less than in 1889. In English wheat patent is at fancy rates; good samples of heavy white are quoted at 33@34s, and red at 32@38s. The sales of English wheat during the week amounted to 27,855 quarters at 35s against 45,746 quarters at 30s for the corresponding week of last year. The heavy imports of foreign wheat prevented an advance. The spring corn trade was firm. Barley advanced 3d. Oats were in small request; prices were against buyers. Maize was in large supply; yet a good inquiry caused an advance of 1d in northern markets and 3d in southern markets. Pulse is up. To-day flour was firm. Oats was held at 3d advance. Barley was firm for spot and cheap for futures. Maize was in good inquiry dearer. To-day the English wheat trade was trivial; demand fair at an advance of Foreign was firm; South American advanced 6d.

INDIANAPOLIS MARKETS.

Trade Good for July, with Higher Prices Indicated on Many Articles. INDIANAPOLIS, July 28.

Trade in most departments is good for midsummer, and there is a feeling that unless the present drought long prevails and the crops fail in this vicinity, trade this fall is to be good. The cotton and wool markets are both firm, and the dry goods men predict firm prices as a result through the fall and early winter. Staple groceries all carry a strong, steady tone. Canned goods and dried fruits will likely be higher than in many years. The commission men are complaining the dry weather is cutting off the vegetable and fruit crops, and making these articles so high that it limits trade. All receipts, however, are readily disposed of. Last year at this time the packers were paying 40 cents a bushel for tomatoes and getting thousands of bushels; they are now paying \$2 and getting but few. Apples and Irish potatoes are still scarce and firm at our quotations. Poultry is firmer. Eggs and butter are in good request at prices quoted, and all along the line there is a tendency to higher prices. The wholesale men will now soon be able to name prices on canned goods and evaporated fruits. J. M. Paver & Co. yesterday received the first car-load of evaporated fruits shipped by Luck & Co. from California this season.

A LADY'S WATCH, Gold-Filled Hunting-Case,

The above is a correct representation of the front case, and the back is even more beautiful, being a five landscape engraving on the gittering gold. The cases of this watch are warranted for fifteen years, and the movement bearsthe stamp of the Elgin National Watch Company, which will convince any and all that the watch is good for a life-time.

A GOLD "FILLED" STOP WATCH,

DESCRIPTION OF GOLD WATCH It is the genuine gold-"filled" or "reinforced" case, and patented, and made only by half a dozen manufacturers, and is the same for use and wear as the solid gold case, and may be so considered and treated. Even the costliest watches on the market new have them, on account of their greater strength. With each watch there goes a guarantee by the Manhattan Watch Company to keep it in order for one year free of all charge.

The little post on the left hand stops and starts the watch; the little post on the right hand turns the hands, setting the watch. It need never be opened. It is a ratchet stem-winder, full jeweled balance movement, and as good a time-keeper as any man wants. The back of this watch is exquisitely engraved by

\$7.00.

Description of SILVER WATCH Only \$7.

The face of this watch is precisely the same as that of the gold watch, and the movement is precisely the same. The difference between the two watches is only in the case. The latter is of oxidized silver, acid eaten, very neat and quaint.

The movement is the quick train, with straight line lever escapement, with a direct-acting hand-set that permits accurate setting, and will not allow the hands to move out of position while setting. In the sweep second movement the second hand is run direct from the movement train, insuring perfect motion, while the dial train and hands are run by a friction pinion from a side center. This gives all the delicately adjusted and expensive movement. Each watch is put up in a neat hox, padded, to carry it safely through the mails. In the box are directions for setting the hands and regulating the watch, with the name of the person at the factory who tested and packed it. If on receipt of the watch it does not regulate or keep time, or is found out of condensing any way. order in any way, it is to be returned to the Manhattan Watch Company, No. 234 Broadway, and it will either be put in perfect condition or a new one sent, FREE OF ALL OHARGE. This guarantee is good for one year, during which the company agreed to keep the watch in perfect running order free of all The silver case has a direct instead of a ratchet stem-wind, and snap-back instead of a screw-back. The guarantee is the same for both, for the move-These WATCHES, in time-keeping, appearance and durability, equal to the best.
